Disclosing fingerprints from web application technologies is security-sensitive javascript:S5689

CategoryOthers

Review priorityLOW

AssigneeNot assigned

Status: To review

This Security Hotspot needs to be reviewed to assess whether the code poses a risk.

Change status

/app.js

```
15 db.once('open', function () {
16   console.log('Connected to MongoDB');
17 });
18
19 // Init app
20 var app = express();
21
22 // View engine setup
23 app.set('views', path.join(__dirname, 'views'));
24 app.set('view engine', 'ejs');
25
```

What's the risk?Are you at risk?How can you fix it?

Disclosing technology fingerprints allows an attacker to gather information about the technologies used to develop the web application and to perform relevant security assessments more quickly (like the identification of known vulnerable components).
